

# Highlights From the Fiber Deployment Roundup Blog

Since the last issue ...

- Verizon added 200,000 FiOS subscribers in 4Q2011.
- Australia launched a pilot telehealth program over its nationwide FTTH network.
- Service providers began deploying vectoring technology to increase the bandwidth and reliability of VDSL2.
- Southwest Minnesota Broadband Services turned up its first FTTH customers.
- And more – see it all on BBCmag.com.

To stay up-to-date on news about FTTH projects, see the **FIBER DEPLOYMENT** blog at BBCmag.com.
